

Scripting Languages

Homework #2

1. Create a page that looks like this for a screen with the width over 800px: **(40pts)**

2. For the screen width between 600px and 800px it should look like this: **(30pts)**

3. For the screen width less than 600px it should look like this: **(30pts)**

Note:

Colors of the different elements don't have to be exactly the same as displayed, however, please make sure that they're at least different from each other.

Hint:

You might want to use media queries.
